## TRAINING & PROFESSIONAL DEVELOPMENT

### Lean Maintenance Made Simple

A one day course covering everything you need to know to move from fire fighting to maintenance excellence and onto lean maintenance excellence. Evolving to a 2025 maintenance management model is impossible without first systemising your technical competence and confidence. Attendees are challenged to relate the training examples to their own work environment. Although relevant to any cmms, the course draws examples from the BWM program. Training resources include a copy per person of the How To Build Factory Race Teams training work book.

NZ\$850+GST pp incl resources

Onsite training, minimum numbers apply + travel disbursements.

### Health and Safety Made Simple

A one day course designed to provide your staff with the conceptual understanding, methods, resources confidence and **INSPIRATION** to unravel the mysteries of health and safety management. The training is relevant to line management and operational staff alike and an essential primer to those working with health and safety in your business. Issues with health and safety stemming from a basic lack of understanding of the simple principals: it looks hard so it must be hard.

NZ\$850+GST pp incl resources

Onsite training, minimum numbers apply + travel disbursements.

### Guarding and The Safe Use Of Machinery

Competency training to understand and implement the requirements of Worksafes Best Practice Guideline on the Safe Use Of Machinery. The one day training session covers the following:

- Responsibilities and duties, Identifying, assessing and controlling, machinery hazards and risks, eliminating hazards at the design process, guarding types and their selection, Intro to AS4024, further WorkSafe guidance, safe systems of work.

NZ\$850+GST pp incl resources

Onsite training, minimum numbers apply + travel disbursements.
